Interesting Facts

Economical Cooling

Ceiling fans are highly **energy-efficient** and consume significantly less electricity making them perfect to **run off solar panels and inverters**. By using **fans in conjunction with your air conditioning**, you can **reduce your energy consumption and utility bills** while still maintaining a comfortable environment.

Artistic and Stylish Spaces

The era of **artistic and stylish spaces** has ushered in a new appreciation for the humble ceiling fan, transforming it into a **statement piece** that seamlessly integrates with **modern interior trends**.

Efficiency and Comfort

Beyond aesthetics, ceiling fans are **masters of cooling efficiency**. During **hot summer months**, they circulate air, creating a **wind-chill effect** that makes you feel cooler.

Customization

Solent's ceiling fans are available in a wide range of **styles, colours, finishes and sizes**, allowing one to select fans that **complement their interior décor**. Whether your taste is traditional, modern, rustic, or minimalist, there is a fan to match your **style & décor**.

AIRCOOL SERIES

— The Grandiose Collection

The Aircool Series, featuring six blades and blade sweeps of up to 3 meters, is ideally suited for public and commercial spaces. These areas include gyms, airports, train stations, malls, restaurants, factories, halls, exhibition centers, and more. One of the standout features of the Aircool Series is its remarkable coverage area. A single Aircool Series fan can effectively cool an area of up to 150 meters, surpassing the performance of eight regular fans. This makes it a highly efficient cooling solution for larger spaces.

Three year Limited Warranty

Warranty

Solent Trading extends the following limited warranty to the user/purchaser of this product:

- 1. Fan Motor Warranty:** In the event of a **motor failure** within three years from the date of purchase **due to a defect in material or workmanship**, Solent provides complimentary labor for repair or replacement. Purchasers are responsible for any costs incurred after the initial three-year period.
- 2. Fan Accessories Warranty:** The three-year warranty **covers fan accessories, including remote controls, wall controllers, light fittings and glass light shades. Lamps are not covered.**
- 3. Exclusions from Warranty:** This warranty **does not extend to any changes in painted finishes resulting from climate conditions or direct exposure to water, moisture, or corrosive conditions.** Proceeding with outdoor use is done at your own risk and will void the warranty.
- 4. Warranty Void Conditions:** This warranty becomes void and is inapplicable in cases of **damage resulting from improper installation, neglect, accident, misuse**, or lack of a serial number, or as a result of **any modification**. Additionally, the use of **fan accessories** such as remote controls, wall regulators or light fittings that are **not Solent approved and branded** will also void the warranty.
- 5. Exclusive Remedy:** Please note that any repair or replacement provided by Solent Trading cc constitutes the exclusive remedy available. **No other expressed or implied warranties exist.** Solent Trading cc expressly disclaims all implied warranties, including those of merchantability and fitness for a particular purpose, to the extent permitted by law. **Solent Trading cc shall not be liable for incidental, consequential, or damages arising from or in connection with product use or performance, except as may be otherwise provided by law.** This warranty grants you specific rights.
- 6. General Fan Operation:** Please be aware that a degree of wobble and noise is typical and should not be viewed as a problem or defect.
- 7. Reporting a Faulty Fan:** Any defective motors or parts must be reported in writing to Solent Trading cc by completing the Faulty Fan Report in full. Please visit https://www.solent.co.za/report_faulty_fan to submit your Faulty Fan Report.

Returns Policy

- Under no circumstances may a ceiling fan be returned without proper authorisation from Solent Trading cc. The receipt of purchase, or invoice number must accompany authorised returns. The fan to be returned must be properly packed to avoid damage in transit.
- All returns will incur a 10% handling fee.

Reporting a Faulty Fan

To submit a Faulty Fan Report, click on "Report A Faulty Fan" on our website and follow the steps below - www.solent.co.za/report_faulty_fan

1. Complete the Retailers Details in full.
2. Fill out the End User OR Contact Person on Site and Installer Details.
3. Upload the retailer's invoice, photos or videos that pertain to the Faulty Fan Report, you can upload multiple attachments.
4. Provide a full description of the faulty fan by ticking the relevant boxes.
5. Provide a Full Description of the Ceiling Fan Fault in the next step.
6. Click the Submit button. That's it! It's quick, easy and stress-free!

Once you have submitted the report, you will receive an email from Solent confirming that we have received your Faulty Fan Report (FFR) and one of our consultants will be in touch.

If you are unable to view the page correctly,

hold down the CTRL button and press F5 on your keyboard, simultaneously, to refresh your page.

If you have any questions, please don't hesitate to contact us on 031 563 4600

or email us at faultyfans@solent.co.za

Solent Technical Guide

Motors

- **Maintenance free & silent operating** - Crompton Greaves Superbrand motors ensures noise-free cooling.
- **Energy efficient & environmentally friendly** - Consumers are choosing ceiling fans over air conditioners, the desire to lead a greener lifestyle and save big on energy costs is reason enough.
- **Letter of authority** - All models have been tested and comply with the compulsory safety specifications.

Motor Models	Number of Blades	Reverse Option	Light Kit Option	Colour Finishes	Power Input	Current Amps
Whirwind	3	No	No	Standard only	60w	0.28
High Breeze	3 & 4	Yes	Yes	Standard, Antique & Trend	75w	0.35
High Breeze 100	3 & 4	Yes	Yes	Standard, Antique & Trend	100w	0.50
Senorita	3	Yes	Yes	Standard, Antique & Trend	80w	0.37
Maxima	3 & 4	Yes	No	Standard & Trend	75w	0.35
Maxima 100	3 & 4	Yes	No	Standard & Trend	100w	0.50
Albatross	3 & 4	Yes	No	Standard & Trend	100w	0.50

Light Kits

- Solent Light Kits are **optional** and easy to fit. Light kit metal base matches the motor colour.
- Use a **Wall Regulator** or **RemoteL5** to control the light kit.
- Suitable for **Edison Screw (ES) and Energy Saving Lamps**. LED has thermally stable 1mm thick Aluminium PCB.
- The Brown and Blue wires provided with the motor for the light should be removed if a light kit is not used.

LED Light Kit has 3 interchangeable colour options:

- Kelvin: Interchangeable Colours - **3000K: Warm White** / **4000K: Neutral White** / **6000K: Cool White**

You can change between these colour options by switching the light switch at the wall or the light button on the remote, off and on.

Code	Model	Input Voltage	Lamp Holder Quantity	Lamp Holder Type	Lamp Wattage	Kelvins / Lumens
LKC	Cleo	220V - 240V	2	ES27	2 x 15W	1200 Lumens / 4200K
LKO	Oyster	220V - 240V	2	ES27	2 x 15W	1200 Lumens / 4200K
LKLED	LED	220V - 240V	1	1 x Multi Colour SMD (surface mount display)	22W	2200 Lumens / 3000-4000-6000K

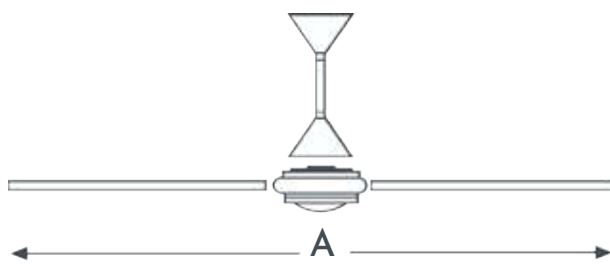

Solent Technical Guide

Blades

- **Precisely balanced** - Each blade in the set is the same weight which ensures that the fans are wobble free.
- **Aluminium** - Corrosion resistant and aerodynamically shaped, providing highly effective cooling.
- **Wood** - Marine ply and weather resistant ensures no swelling, sagging or distortion. Designed for optimal air delivery but less effective than the aluminium blade.
- **Air delivery and fan speed** - Vary greatly depending on the number of blades, blade sweep and blade material. Wood blades will spin slower than aluminium blades.
- **Blade sets** - Number of blades vary for each motor model. More blades does not necessarily mean more air delivery but can be more aesthetically pleasing than a three blade fan.

Blade Sweep Selection

Below is a general guide for ceiling fan sizing based on your room's dimensions. To achieve effective cooling in a room, ceiling fans must be strategically installed where people congregate.

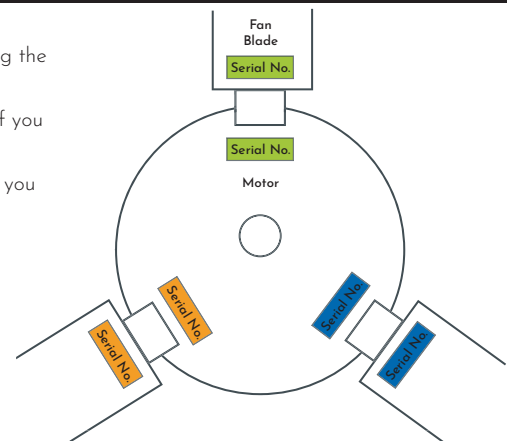

Blade Sweep	For rooms up to	Room Size
900mm	9 Square Meters	(3mx3m)
1200mm	12-16 Square Meters	(4mx3m/4m)
1400mm	20-25 Square Meters	(5mx4m/5m)
1500mm-1650mm	30-36 Square Meters	(6mx5m/6m)
1800mm	36-48 Square Meters	(6mx7m/8m)
2000mm-2100mm	48-54 Square Meters	(6mx8m/9m)

Blade sweep selection - The overall diameter from blade tip to blade tip.

Safety - Take into account that the blades need to be clear of open cupboard doors, not be within reach of bunk beds and not cross over any lighting as it may cause a flickering effect.

Wood Blade Installation

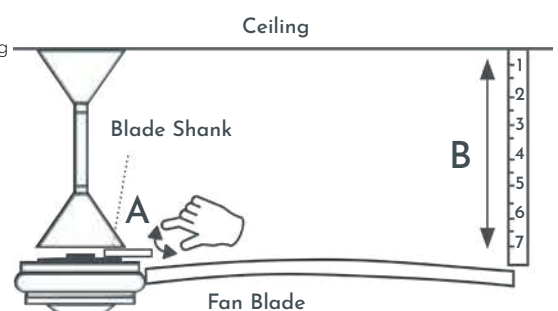

- It is recommended that you mount the ceiling fan motor to the fixing point before attaching the blades.
- Each motor is paired with its own set of wooden blades, be careful not to mix up the sets if you have purchased more than one set of wooden blades.
- Match the serial number on the blades with the serial number on the motor to ensure that you have paired the correct sets together.
- Match the colour on the blades with the colour on the motor.

Fan Imbalance

In the unlikely event of your fan running unbalanced after installation, or after a period of time, there is now an easy way to re-balance.

- Turn fan off.
- Use a measuring tape or a carpenters square to measure the distance between ceiling and the tip of fan blade as shown below.
- Mark on tape or square and repeat with other two blades.
- Carefully bend blade(s) at bracket in the required direction until all three blades measure precisely the same distance to ceiling.
- Your fan should now run smooth and balanced.

Solent Technical Guide

Downrods

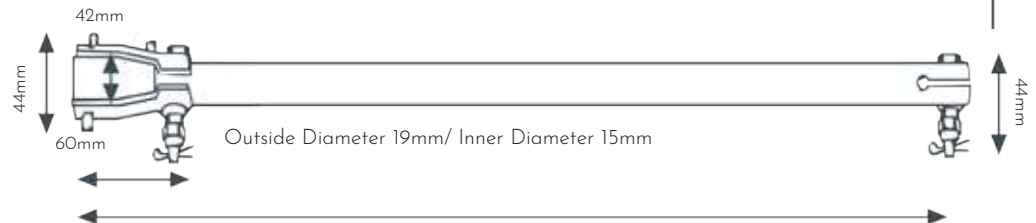

A standard 230mm Downrod, Shackle Assembly and Hanging U Hook are supplied with each fan.

- Customized Downrods lengths are available, up to 6 metres.
- No wobble or movement when using long Downrods.
- Shorter Downrods of 170mm can be used on certain models, however the fan will be prone to wobbling and less effective air delivery.

Downrod Lengths

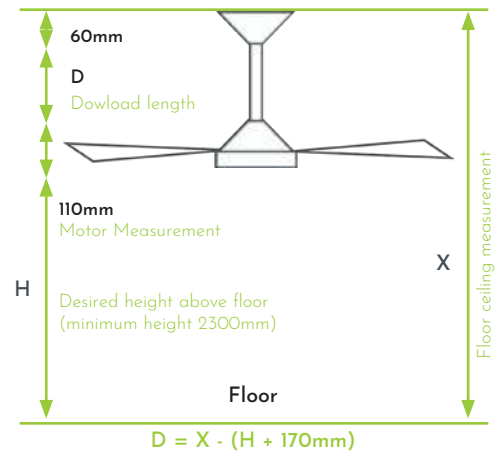

170mm | 230mm | 450mm | 900mm | Custom made up to 6m

Downrod Dimensions		
Downrod	A (mm)	B (mm)
170	260	330
230	320	390
450	520	590
900	970	1 040

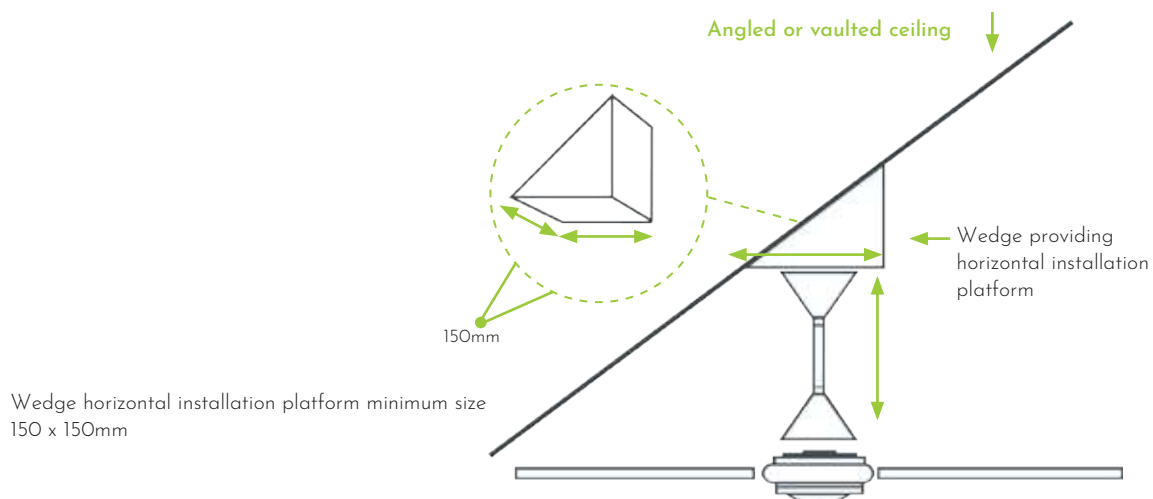

Downrod Length Calculation

- **Minimum height regulation** - For safety reasons fan blades should not be lower than 2300mm above floor level.
- **Maximum height installation** - No restrictions, however fans mounted too high will affect the cooling efficiency.

Downrod Installation on Angled/ Vaulted Ceiling

- **Install a wedge** that provides a horizontal surface for attached the downrod. Downrod must be long enough to prevent the blades from hitting the sloped ceiling.
- **Maximum height installation** - No restrictions, however fans mounted too high \ will affect the cooling efficiency.

Solent Technical Guide

Regulators

- **Aesthetically pleasing** Cover plates available in an array of colours. White is standard but customizable colours available on request in flush or wall mounted.
- **Single regulator (Reg1F)** can only be used to operate one fan.
- **Multiple regulators (Reg2F/Reg3F)** are available for operating more than one fan.
- **Electronic regulators** are NOT recommended as these will cause the fans to make a noise. **Light switches** or dimmers can be added to the regulators. The Dimmer Press button acts as an on/off switch and dims or brightens the light when held down.
- **Reverse option** can be used by installing a 2 way switch at the wall regulator.

Code	To Control	Voltage Input	Electrical Control System	Speed Settings
Reg1F	One Fan	240V	Capacitance	5
Reg2F	Two Fans	240V	Capacitance	5
Reg3F	Three Fans	240V	Capacitance	5

NB: Reg1F & Reg1FIS must be used with Whirlwind, High Breeze, Seniorita and Maxima.
Reg2F must be used with High Breeze 100, Maxima 100 and Albatross.

Remote Controls

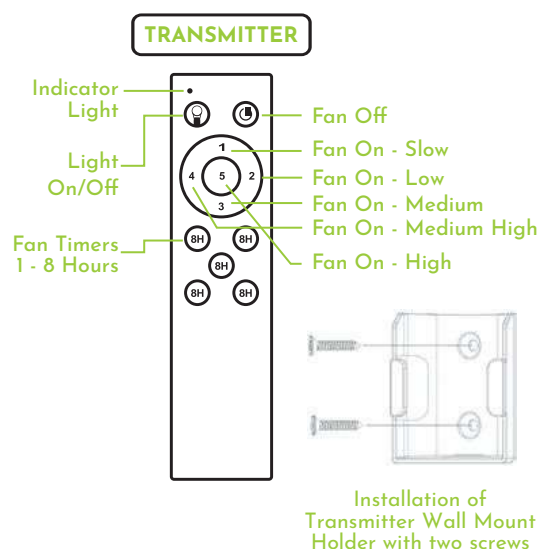

The **Solent 5 speed remote** controller must be paired with the fan after installation.

Transmitter & Receiver Pairing Pairing 1 Transmitter to 1 Receiver (Single Fan)

- Switch ON the Isolator/Light Switch for the fan.
- Within 30 seconds of switching the Isolator/Light Switch ON, press the FAN]
- OFF button until the fan starts rotating.
- Pairing is now complete.

Pairing 1 Transmitter to Multiple Receivers (Multiple Fans)

- Each fan must be paired individually and must have its own Receiver and own Isolator/Light Switch.
- Start pairing by switching the Isolators/Light Switches OFF for all the fans.
- Switch ON the Isolator/Light Switch for the fan you are pairing.
- Within 30 seconds of switching the Isolator/Light Switch ON, press the FAN OFF button until the fan starts rotating.
- Pairing is now complete for that fan.
- Switch OFF the Isolator/Light Switch for the fan you have just paired, this will store it to memory.
- Move to the next fan, using the same Transmitter, perform points 1 to 5 to pair the 2nd fan. Use this method to pair each fan until all fans are paired.

Timer

There are 5 Timers - The Timer must be set while the fan is in rotation and it can be set on any speed. Press the desired Timer to put the fan in sleep mode and the fan will turn off when the selected Timer is reached.

- Do not use a remote simultaneously with a wall regulator.
- Reverse option can be used by installing a 2 way toggle switch in the bottom canopy.
- Room lights can be operated by the Remote L5.
- Maximum light load - 300 watts. (6 x 50watt downlighters)

Receiver Memory Function

After a power outage or a tripped circuit breaker, the fan will default to Fan ON. The fan will run at the speed that was last saved in memory.

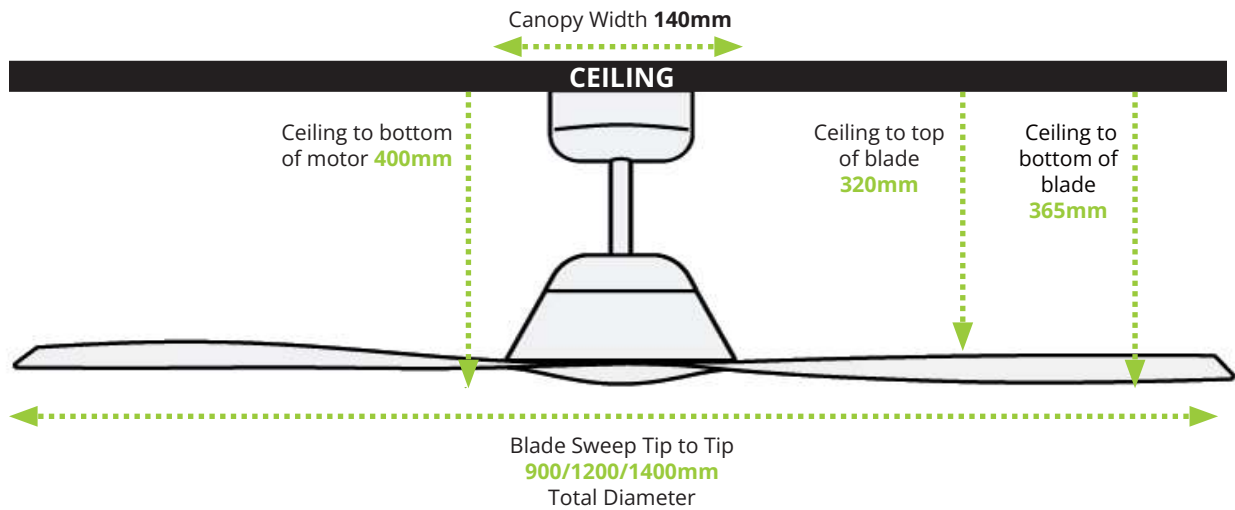

Battery supplied - Your remote control is ready for use after battery installation.

Receiver Range - Approximately 10 metres.

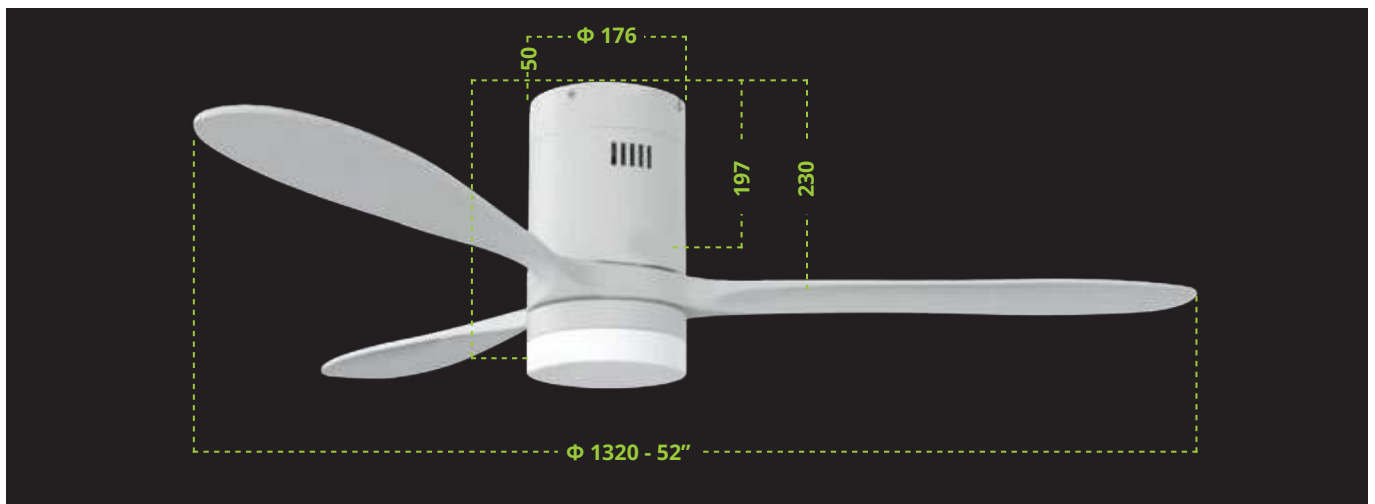

Code	Type	Voltage Input	Max Fan Load	Max Light Load	Electrical Control System	Speed Settings
RemoteF5	No Light	240V	100W	300W	Capacitance	5
RemoteL5	Light On/Off	240V	100W		Capacitance	5
